『Water Save Our World』

Nanzan Kokusai High School

Taito Ikuse, WooJun Lee, Kaede Nishida, Sayano Takahashi

National Feng-Hsin Senior High School

Voda Lin, Chloe Lai , Emma Tsai, Karen Sun

With thinking deeply into water, we can solve major world problems (poverty, wars, food problem etc.) That is what we came up. However, in Japan and Taiwan, where we live, water is very relevant, so we have not thought of water problem that much. But ourselves and the water, also the water problem are very related. With “water” being the keyword, let’s think together of how we can solve these problems and make a better world.

【POINT】

- Water causes poverty, war and food problem etc.
- Do you know Virtual Water?
- How can we solve major world problems with thinking of water?
